

Maxcon Industries has worked with a number of various enterprises over the years, across several different sectors.

We offer design, drafting, fabrication, industrial coatings application, tile-lining, transport and installation, meaning that we can offer a complete package from start to finish.

As a result, this has enabled us to offer our comprehensive capabilities to many different industries and ensures that as a continuously growing company we can cater to each individual client's specific needs.

Due to the unique and exceptional nature of each of the products we have manufactured, it is somewhat difficult to compile a comprehensive product list.

However, as we have catered for a broad range of industries over the years, we have an extensive experience and knowledge base that extends across several corporations and can cater to an assortment of different needs.

Maxcon Industries staff includes professional engineers, draftsmen, boilermakers, fitters and turners, painters and other trades, enabling the company to provide a complete manufacturing, coating, installation, commissioning, operation and maintenance service. Our quality fabrication staff are supported by experienced Quality Assurance and Project Management personnel.

Below is a list of Industries that have commissioned Maxcon Industries' expertise in one way or another, with case studies and illustrations of each of the finished products.
